RE: Slabtown-Bluelick Roads Low Pressure Sewer Improvement Area

Dear Property Owner:

This letter is to serve as an update for the above-referenced project. This project was initiated due to a Combined Allen County General Health District recommendation to install public sanitary sewers within the Slabtown-Bluelick Roads Low Pressure Sewer Improvement Area. This recommendation was based on water sampling and testing of drainage tiles and tributaries serving the area. Test results indicated a public health problem and pollution hazard.

For several years, the Allen County Sanitary Engineering Department has been pursuing various funding opportunities but unfortunately the project has not qualified for any grants. The Department was recently able to secure a zero percent, 30-year Ohio Public Works Commission loan for the construction of the sanitary sewer force main and purchase of the grinder pumps. Construction will take place late summer/early fall of 2024.

With this loan secured, the Department is finalizing plans and will schedule an informational meeting early next year to discuss project details, schedule, connection procedure and cost.

If you have any questions, please contact our office at 419-996-4670.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ronald J. Meyer II".

Ronald J. Meyer II, P.E., P.S.
Assistant Sanitary Engineer
